

# Energy efficiency - Metrology

What are the procedures to follow in order to ensure the reliability of measures in a company? What techniques and knowledge is required? Our metrology module answers these questions by immersing participants in a real situation. Participants must verify measurement tools through a range of methods, from technical tests to interpersonal communication (a superior, or the manufacturer themselves, can be essential sources of information). You can customize the company in order to focus on specific issues and catch learners off-guard, testing their attention to detail.

## Game play

Length of game	40 mn
Scoring	Yes
Local mode	Solo or Multiplayer: 10 participants
Online mode	Multiplayer: 100 participants

3D Motion

Hand Tracking

Panorama

Sound

Head Tracking

TV / Tablet synchronisation

## Features

VR Headset	HTC, Oculus, Gear
Computer type	Gamer, i7, 16 Gb RAM, Graphics card NVIDIA GeForce GTX 10xx or AMD Radeon RX series, with minimum 2 Gb of memory
Languages	English, French additional languages by request
