

Air conditioning - Basics

When the work heats up: stay cool. This foundational air conditioning course reveals the world of cooling systems in 360°: immersive, packed with information, in higher definition than real life. Understand technical plans, become familiar with the tools and equipment of the trade, and engage in practical work, from within a headset no heavier than a textbook. Interactive scenarios help teach attention to detail, problem solving, and safe behavior.

Features

VR Headset	HTC, Oculus, Gear
